ABOUT THE PROGRAM

Pharmacovigilance (PV) plays a key role in the healthcare system through assessment, monitoring and discovery of interactions amongst drugs and their effects in human. Pharmaceutical and biotechnological medicines are designed to cure, prevent or treat diseases; however, there are also risks particularly adverse drug reactions (ADRs) can cause serious harm to patients. Thus, for safety medication ADRs monitoring required for each medicine throughout its life cycle.

Pharmacovigilance is still in its infancy in India and there exists very limited knowledge about the discipline. There is an immense need to understand the importance of pharmacovigilance and how it impacts the life cycle of the product.

The one-day conference emphasizes global perspectives of pharmacovigilance, its application in pharmaceutical industries, drug safety and adverse drug reaction monitoring in respect to pharmacovigilance. The goal of the conference is to provide a transformative professional development experience.
